

PULP PACKAGING

www.pulppackaging.com

WE MAKE Sustainable Protection Affordable Solutions..

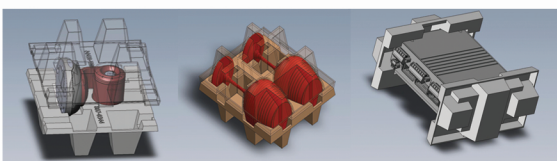

Our core objectives are to deliver sustainable, cost-effective solutions that prioritize recyclability.

Product protection & efficient setups for low-volume production.

Our molded pulp inserts offers the greenest solution for your packaging requirements:

- 1 Lowest cost design and setup fee.
- 2 Lowest volume of inserts (500 inserts).
- 3 100% Recycled pulp.
- 4 100% Recyclable.
- 5 100% Compostable.
- 6 The only company to offer a guarantee of performance upfront.
- 7 Insert design & mold manufacture is completely inhouse.
- 8 Have passed ISTA 3A performance testing up to 58 lbs.
- 9 Offer both single walled & double walled inserts.
- 10 Typically insert prices include freight anywhere in North America.

Why us?

Environmentally Friendly

Made from 100% recycled newsprint.

Is 100% recyclable and compostable. Each insert is embossed with a Recycle Logo for proper after use disposal. We believe in replacing foam with molded pulp.

Space

Our inserts are designed three dimensionally. This allows us to offer superior vibration, impact & cushioning support than traditional die cut cardboard or foam at an affordable price point.

Performance vs Price

Inserts are designed to be nested and stacked.

This results in massive savings in storage & transportation costs for our clients.
